

Save It Easy® can reduce lighting costs
by up to 56%

Save It Easy®

SAVING MONEY

The Save It Easy range offers all you would expect from an energy saving solution - excellent ROI, incredible savings and a long lifetime.

With this product you could reduce the cost of your fluorescent lighting by up to an amazing 56%, without the costly expense of having to change the light fittings.

This fantastic system lets you easily convert your existing fluorescent lighting to the energy efficient high frequency T5 & T8 type..

Retrofit Save It Easy conversion units simply plug into existing Switchstart and Quickstart luminaires, transforming them electronically from conventional fittings to high frequency ballast fittings of correct type and size to accept high-efficiency T5 and T8 fluorescent tubes.

The benefits include:

- * low initial cost.
- * trouble-free fitment and operation.
- * extended tube life.
- * halved maintenance demands.
- * dramatic electricity savings.
- * outstandingly rapid payback.

Demonstration

We are able to easily demonstrate the potential of Save It Easy and show you the product. Please call for more details.

Site Survey

Ivy can undertake a full site survey which will demonstrate the costs and savings to be achieved.

Installation

Ivy can arrange for a warranted team of installers to carry out the Save It Easy fitting.

Funding

There are two potential sources of funding for a Save It Easy installation:

- Carbon Trust Interest-Free Loans - For small to medium enterprises (under 500 employees) meeting Carbon Trust criteria, an Interest-free Loan may be available to cover both units and installation.
- Operating Lease - Where a loan cannot be obtained and capital is not readily available, a Budget from Savings operating lease can immediately mobilise funds to cover both units and installation.

This keeps all finance off balance sheet as an operating expense which is more than met for by the savings resulting from Save It Easy use.

SIMPLE TO USE

This fantastic system lets you convert your existing fluorescent lighting to the energy efficient T5 fluorescent lighting without the need to replace the fittings.

Save It Easy®

Conversion table and energy savings

| Existing Lamp | New Lamp | Save It Easy® Product | Expected Energy Savings % |
|-----------------|----------|-----------------------|---------------------------|
| 8 feet T12 125W | T8 70W | INL-240-070-T8A | 56% |
| 8 feet T12 100W | T8 70W | INL-240-070-T8A | 43% |
| 6 feet T12 75W | T5 49W | INL-UHL-049-T5B | 44% |
| 6 feet T8 70W | T5 49W | INL-UHL-049-T5B | 37% |
| 5 feet T12 65W | T5 35W | INL-UHL-45F-T5A | 50% |
| 5 feet T8 58W | T5 35W | INL-UHL-45F-T5A | 45% |
| 4 feet T12 40W | T5 28W | INL-UHL-45F-T5A | 38% |
| 4 feet T8 36W | T5 28W | INL-UHL-45F-T5A | 34% |
| 2 feet T12 20W | T5 14W | INL-240-014-T5A | 45% |
| 2 feet T8 18W | T5 14W | INL-240-014-T5A | 38% |
